UCRL Trans-446

Trans. of Zhurnal Eksperimental'noy Teoreticheskoy
 Fiziki (USSR) 1958, v. 35, no. 1(7), p. 184-202.

The system of equations for the radial functions de-
 scribing the movement of the alpha-particles that fly
 out in the alpha-decay of nonspherical nuclei with an
 arbitrary spin was examined. Equations were ob-
 tained for (1) determining the boundary conditions for
 the radial functions on the surface of nuclei and (2)
 expressing the probability of alpha-decay through
 values of the radial functions on the nucleus and the
 shape of the nucleus. A simple approximation was ob-
 tained, defining the dependence of the probability of
